

CrossLinked^{HA}

Crosslinked **hyaluronic acid** powder for topical application

CrossLinked^{HA} is a powder with no preservatives nor stabilizers. It is soluble in water forming fine hydrogel microparticle suspension. Beside excellent hydrating and anti-wrinkle properties, it works as a delivery system enabling continual long-term release of other active ingredients into the skin thus increasing their activity.

- ✳ Higher hydrating capabilities than standard hyaluronic acid
- ✳ Immediate reduction of wrinkles
- ✳ More stable - the effects last longer than hyaluronic acid
- ✳ Reservoir of water and active ingredients enabling their gradual release
- ✳ Prepared by patented technology using crosslinking of oxidized HA by propylbisoxamine

HYDRATION

62%
Increase of immediate hydration after 1 hour

WRINKLE REDUCTION

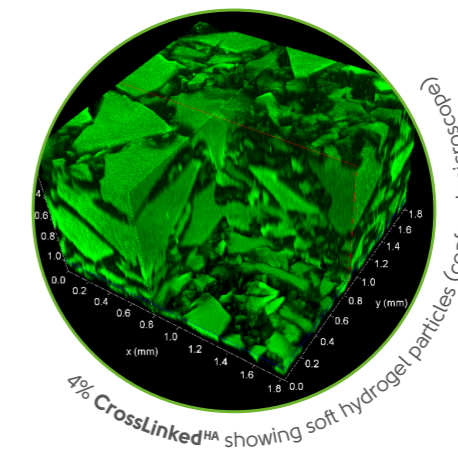

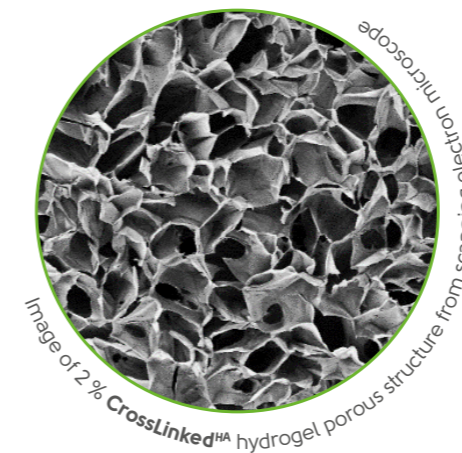

46%
Reduction of wrinkles after 6 weeks

DELIVERY

51%
Increase in the activity of vitamin B3

CrossLinked^{HA} (Oxidized HA crosslinked with propylbisoxamine)

- ✳ Forms a soft hydrogel microparticle suspension in water
- ✳ High water-binding capacity
- ✳ Decreases the irritation risk caused by some active ingredients
- ✳ Higher resistance against hyaluronidases (enzymes present in the skin which degrade hyaluronic acid)
- ✳ Better results in comparison with hyaluronic acid crosslinked with divinylsulfone

APPLICATION

 DAY CREAMS 0.02 – 0.10%

 NIGHT CREAMS 0.01 – 0.05%

 LOTIONS 0.01 – 0.05%

 EYE CREAMS 0.05 – 0.10%

 SERUMS 0.05 – 0.10%

 MASKS 0.05 – 0.10%

INCI:
Sodium Hyaluronate and Sodium Hyaluronate Crosspolymer-3
