

CrossLinked^{HA}

Crosslinked hyaluronic acid powder for topical application

CrossLinked^{HA} is a powder with no preservatives nor stabilizers. It is soluble in water forming soft hydrogel microparticle suspension. Beside excellent hydrating and anti-wrinkle properties, it works as a delivery system enabling continual long-term release of other active ingredients into the skin thus increasing their effectivity.

- ✧ higher hydrating capabilities than HMW HA
- ✧ immediate reduction of wrinkles
- ✧ more stable - the effects last longer than HA
- ✧ reservoir of water and active ingredients enabling their gradual release
- ✧ prepared by patented technology using crosslinking of oxidized HA by propylbisoxamine

HYDRATION

62%
Increase of immediate
hydration after 1 hour

WRINKLE
REDUCTION

46%
reduction of wrinkles
after 6 weeks

DELIVERY

51%
increase in the activity
of vitamin B3

CrossLinked^{HA} (Oxidized HA crosslinked with propylbisoxyamine)

- * Forming a soft hydrogel microparticle suspension in water.
- * High water-binding capacity
- * Reservoir of active ingredients enabling their continual release into the skin for their more effective utilization by the skin cells.
- * Decreasing the irritation risk caused by some active ingredients.
- * Higher resistance against hyaluronidases (enzymes present in the skin which degrade HA).
- * Better results in comparison with HA crosslinked with divinylsulfone (HA – DVS).

APPLICATION

DAY CREAMS

0.01 – 0.10%

EYE CREAMS

0.05 – 0.20%

NIGHT CREAMS

0.05 – 0.20%

SERUMS

0.10 – 1.00%

LOTIONS

0.01 – 0.05%

MASKS

0.10 – 1.00%

INCI:

Sodium Hyaluronate and Sodium Hyaluronate Crosspolymer-3
